

SEO and AI-search audit report

Prepared for Dr. Russ L'HommeDieu · September 29, 2026 · Branch `v0/articles-and-seo-audit` · 46 site files changed

1. Fixes, in priority order

1. Canonical tags on every indexed page point to `https://www.homesafety.solutions/...`
2. Business structured data retyped as `MedicalBusiness` (39 pages), with the clinician as `Person` and verified credentials. No insurance and no school listed, by request.
3. Titles and meta descriptions rewritten to "Page | Home Safety Solutions, Tampa Bay".
4. `sitemap.xml` and `robots.txt` in place; AI crawlers allowed.
5. Custom 404 page linking to services, service area and booking.
6. Breadcrumbs, both visible and in structured data (37 pages).
7. Service pages: `Service` + `offer` data with exact prices, a Key facts box, and an answer-first summary.
8. FAQ expanded to 110 questions with a definitions section; each has matching `FAQPage` data.
9. New `/compare` page and `/articles` page with two articles.
10. `llms.txt` and `llms-full.txt` (full text of 13 core pages).
11. Reviewed-by and Last updated lines on the six service pages and Compare.
12. Service area: communities paragraph plus a "What we look for in Tampa Bay homes" section (sunken living rooms, lanai sliders, pool decks, hurricane season).
13. Speed: six images converted to WebP (2.68 MB to 307 KB total; the service area map went from 822 KB to 78 KB). Footer logo and OT icon lazy-load; the OT icon has explicit dimensions; preconnect to IntakeQ on booking pages.
14. Vercel Web Analytics and Speed Insights tags on every page. Search Console and Bing verification placeholders on the homepage.

2. Structured data results

All 57 JSON-LD blocks across the site parse cleanly. Types in use: `MedicalBusiness`, `Person`, `EducationalOccupationalCredential`, `Service`, `Offer`, `OfferCatalog`, `FAQPage` (8 pages, 131 questions), `BreadcrumbList`, `Article`, `WebPage`, `AboutPage`, `ContactPage`, `CollectionPage`, `ItemList`.

Not yet run: Google's Rich Results Test and the schema.org validator. Both need a public URL, so run them on the deployed preview (see checklist).

3. Internal linking

- Every service page links to FAQ, Service area and About from its main content.

- Every audience page links to booking from its main content and to at least one relevant service page.

4. Scores

Lighthouse and Core Web Vitals scores need the deployed site, since dev-server numbers aren't representative. Before-and-after measurements should be taken on production before and after this branch is merged. Speed Insights will record real-user Core Web Vitals from launch.

5. Article ideas (not published)

Drawn from common questions in this field. Not yet checked against keyword-volume data.

#	Target question	Intent	Suggested outline
1	What should the house have ready before a hospital discharge?	Urgent, practical	Bathroom, bed, path, entry; what can wait; who checks it
2	Who does a home safety assessment, and is a PT or OT the right person?	Compare providers	Roles; contractor vs clinician; questions to ask
3	How do I make a sunken living room safe for a walker?	How-to	Risks; rail, ramp, room-use options; when to get an assessment
4	Is a lanai sliding door a fall risk?	How-to	Track height; door weight; threshold ramps; device width
5	How do I keep a power wheelchair or oxygen working in a hurricane?	Seasonal, urgent	Batteries; backup power; special-needs shelters; evacuation plan
6	What grab bars do I actually need in the bathroom?	How-to	Placement; blocking; suction bars; why a fitted plan beats a kit
7	Can my parent age in place in their current home?	Decision	Signs it works; signs it doesn't; what an assessment answers
8	What happens during a home safety visit?	Pre-booking	Before, during, after; the written plan; what to have ready
9	Is a free contractor home safety check really free?	Compare	Incentives; what a clinician looks for; independence policy
10	How can I check on a parent's safety from another state?	Remote caregiving	Video visits; sensors; who to call locally
11	What's the difference between a ramp, a threshold ramp and a lift?	Research	Slope rules; space; cost range; when each fits
12	How do I prevent falls at night?	How-to	Lighting; path to bathroom; bedside setup; medication timing
13	Should we buy a one-story home before retiring in Florida?	Decision	What to check on a tour; Right Home service

#	Target question	Intent	Suggested outline
14	Does Medicare pay for a home safety assessment?	Cost	Plain answer; what this practice charges; no insurance billed

6. Manual checklist for Dr. Russ

- ☐ Google Search Console: add the property, paste the verification code into the homepage placeholder, and submit `/sitemap.xml`.
- ☐ Bing Webmaster Tools: same steps (or import from Search Console).
- ☐ Vercel: turn on Web Analytics and Speed Insights in the project dashboard.
- ☐ Confirm `homesafety.solutions` redirects to `www.homesafety.solutions` in Vercel Domains.
- ☐ Run Google's Rich Results Test on the homepage, one service page, the FAQ and one article.
- ☐ Google Business Profile: set it up as a service-area business (hide the street address), then add services, prices and the booking link.
- ☐ Bing Places and Apple Business Connect: same details.
- ☐ Directories: RESNA ATP directory, APTA Find a PT, and any local Area Agency on Aging provider list.
- ☐ Review the community list on `/service-area` and remove any town you don't visit.
- ☐ Review the contractor column on `/compare`.
- ☐ Choose which article ideas to write or approve.
